Symposium

**Metropolis Nonformal – Anticipation**

Launching the UN-Habitat Hub on Informal Urbanism

**November 20 – 23, 2013**

**Munich, Germany**

Informal urbanism is one of the dominant forces for urban growth in developing countries. During the last half-century a range of interventions sought to improve living conditions in nonformal neighborhoods. However, there remains a lack of feasible strategies to address the needs of the additional two billion informal dwellers expected by 2050. Despite this surge, many policy makers continue to focus on the prevention of informal urbanization. In contrast, Metropolis Nonformal acknowledges that self-construction may be the only viable urbanization model for low-income migrants. Cities must discard the unrealistic attitude of prevention and embrace an attitude of anticipation and collaboration.
